PARTICLE COUNTER DT-9880 / 9881

Product Description

The DT-9880/9881 Particle Counter, is a professional-grade instrument, for monitoring air quality and measuring particle sizes between 0.3µm and 10µm. Color TFT display, built-in camera, temperature and humidity sensors, data recording capabilities. It, fitom, cleanrooms, near multi systems, indoor air quality assessment, and facility maintenance in laboratories, production facilities, and public data environments.

Key Features

- 6-channel particle size measurement
- Photo/Video function (model DT-9881)
- Large 2.8" color TFT Display
- Temperature and Humidity measurement
- Data recording for 5,000 records
- USB interface for data download
- Sound and light alarm function
- Real-time data printing (optional accessory)
- Ergonomic design with rubberized grip

TECHNICAL SPECIFICATIONS

DT-9880 / DT-9881

Measuring Range	0.3µm, 0.5µm, 1.0µm, 2.5µm, 5.0µm, 10µm	
Air Flow Rate	2.83 L/min (±0.1CFM)	
Temperature Range	-10°C to 60°C. (14°F to 140°F)	
Photo / Video	DT-9880: N/A	DT-9881, Built-in
Data Storage	5,000 Records	
Display Type	2.8" Color TFT LCD	
Alarm Function	Adjustable-limits with sound & light alarms	
Interface	USB, RS-232, MicroSD-card	
Battery Type	Rechargeable Li-ion battery	
Weight	455g
