

Differential Pressure Gauge Box (Magnehelic Gauge Mounting Box)

Product Overview

The **Differential Pressure Gauge Box** is a high-quality mounting enclosure designed specifically for Magnehelic and differential pressure gauges. It provides a secure, hygienic, and professional installation solution for pressure monitoring instruments used in HVAC systems, cleanrooms, pharmaceutical facilities, and industrial environments.

Manufactured from **durable stainless steel**, the gauge box ensures long service life, corrosion resistance, and easy cleaning, making it ideal for controlled and clean environments.

Key Features

- Designed for Magnehelic & Differential Pressure Gauges
- **Stainless steel construction** for durability and corrosion resistance
- **Smooth surface** for easy cleaning and hygiene compliance
- **Accurate panel cut-out design** for secure gauge fitting
- Suitable for wall mounting
- **Professional appearance** for cleanroom installations
- Long-lasting and maintenance-free design

Applications

- Cleanrooms (ISO / GMP environments)
- HVAC systems
- Pharmaceutical & Biotechnology industries
- Hospitals & Healthcare facilities
- Laboratories
- Food & Beverage processing
- Industrial air handling units

Technical Specifications

Parameter	Differential Pressure Gauge Box
Product Type	Magnehelic / Differential Pressure Gauges
Material	Stainless Steel
Finish	Polished / Brushed
Mounting Type	Wall / Panel Mount
Panel Cut-out Diameter	115 mm
Front Panel Width	143 mm
Front Panel Height	161 mm
Application Area	Indoor / Controlled Environments

Advantages

- Ensures proper gauge alignment and protection
- Enhances instrument lifespan
- Provides professional and clean installation
- Easy to install and maintain
- Suitable for critical pressure monitoring applications
